**AI Engineer and Backend Specialist with 8+ years** of experience in designing scalable **AI-powered workflows, blockchain platforms, and distributed systems**. Recognized for **Kafka** implementations, **MongoDB**-driven architectures, and **AI** automation pipelines that optimize business processes. Proven expertise in **Go, Java, Spring Boot, AWS, Node.js, and Python**, with hands-on delivery across **FinTech, Blockchain, IoT, Telecom, Crypto, Payment and Logistics** domains. Passionate about **building intelligent, secure, and high-performance solution**.

## EXPERIENCE

### JumpCloud India

SDE-III Sept 2024 - Present, Remote

- Built scalable backend services using **Go, gRPC, and Node.js** for identity and directory platforms serving enterprise customers globally.
- Developed **Active Directory Integration (ADI)** services enabling seamless cross-system user and group synchronization across platforms.
- Designed real-time synchronization pipelines, improving data consistency and reducing replication latency by over 40% in production.
- Designed and Implemented **LLM**-powered test automation frameworks using RAG and Python, reducing manual QA effort and speed up release.
- Achievements**
  - Led adoption of **AI-powered automation** across backend testing flow.
  - Finalist in internal hackathon for building AI-based debugging assistant

### Adobe Systems

Member of Technical Staff - II Aug 2021 - Sept 2024, Remote

- Built Kafka-driven event-streaming services enabling high-throughput, low-latency communication across distributed microservice systems.
- Spearheaded CI/CD pipeline automation using Jenkins and Kubernetes, reducing deployment cycles by 30% across multiple teams.
- Implemented real-time monitoring dashboards with AI-driven failure prediction, enabling proactive issue detection and faster recovery.
- Developed Java and Node.js microservices with Spring Boot deployed on Kubernetes, ensuring 99.9% production availability at scale.
- Achievements**
  - Winner, Adobe Hackathon (AI/ML Track) for Emotion Recognition.
  - Received **Adobe Impact Award** for improving deployment efficiency

### Amdocs India (Payroll: Joules to Watt)

Software Engineer Jul 2019 - Mar 2021, Pune

- Designed and deployed real-time 5G billing microservices using Kafka, Couchbase, and Spring Boot, processing millions of daily transaction
- Architected scalable microservices on Kubernetes, improving system reliability, deployment, and horizontal scalability across services
- Optimized high-traffic applications for better throughput and resilience, reducing downtime during peak production workloads.
- Led production deployments and resolved critical real-time issues by collaborating with cross-functional engineering and operations teams.

### Vihaan Network Ltd

Graduate Engineer Trainee Apr 2018- Jul 2019, Gurgaon

- Developed REST APIs and fault-tolerant microservices (Eureka), along with WebRTC (Kurento API) for real-time streaming for IOT system alerts
- Supported production deployments, resolving real-time technical issues in collaboration with cross-functional teams.

## EDUCATION

AKTU Gr.Noida 2018

B.Tech in Computer Science Engg.

## SKILLS

### AI & Automation

LLMs, Lang-Chain, Lang-Graph, Hugging Face, RAG-chaining, VectorStore, Embedding.

### Backend & Programming

Java, Spring Boot, Node.js, Python, Go, Microservices, Rest, gRPC, Mockito, Junit, Cumunda, PyTest

### Databases

MongoDB, Cassandra, Couchbase, PostgreSQL, MySQL.

### Event Streaming

Kafka, RabbitMq, SQS, Spring Cloud Stream, Spark, Flink.

### Blockchain & Security

WalletLib, Mining Flow, Smart Contracts, Crypto Monitoring, API Security.

### DevOps & Cloud

AWS, EC2, EKS, IAM, Kubernetes, Docker, Jenkins, CI/CD, Github, Akamai. BrowerStack Test,

### Foundations

DSA, Algorithms, Multithreading, Distributed Systems

### Thirdparty Integration

Zoho-subscription/Billing, Zoho Payment, Razorpay, Now-payment, Stripe, DataDog, Grafana, Spunk,

### Extra Projects

- Shakti Coin: Blockchain microservices with crypto monitoring
- AI Chatbots: LLM-based assistants for fintech/logistics
